

To Whom it May Concern: As head of Sales for PFN Communications, Inc.-a fax broadcasting company that has been serving the healthcare industry since 1992, I see the requirement to acquire signatures for fax recipients,for every company, DEVASTATING TO OUR COMPANY. Since 1992 we have maintained an OPT-OUT file for anyone who wishes to be removed for the fax list. Once they go on the OPT-OUT file, they remain on the file for GOOD! I have heard some of the complaints coming from recipients of faxing companies that fax millions of Anything to Everyone, and feel these are the ones who are doing the damage by not following any guidelines. Our clients are Continuing Medical Education companies who send one or two pages to Doctors and other professionals who require a certain amount of CME credits each year. We have been told many times since our start that fax broadcasting, if DONE CORRECTLY is VERY effective and keeps down costs. Also, we can't possibly make effective decisions on what to do to save our company and others between now and August 25th. I'm asking for a Stay in this matter! Thank You for your time.
